Apply in Just Seconds With a Heat Gun...
The Ladies Will Love It!

SURPRISE THE LADIES WITH HOT PINK VINYLGUARD FLAGSTICKS!

Dress up your golf course for Ladies' Days, Breast Cancer Awareness Events and Fund Raisers

DON'T THROW AWAY YOUR OLD FLAGSTICKS – RENEW THEM WITH VINYLGUARD

HOT PINK for ½" Regulation Flagsticks and ¾" Tapered Tournament Flagsticks

- Quick and easy to apply and remove
- Attractive, extremely durable and easy-to-clean
- A box of 250 ft. will cover 30 - 35 flagsticks

GETTING STARTED

- Cut a piece of vinyl 3" longer than the flagstick to allow for longitudinal shrinkage
- Slide the material over the flagstick, pushing it down against the ferrule

USE A HIGH TEMPERATURE HEAT GUN WITH A HEAVY-DUTY AIR BLOWER

- Hold the heat gun a few inches away from the material
- Keep the gun moving back and forth to prevent burning
- Do not apply heat directly to the crease

SLOWLY begin shrinking at the bottom of the flagstick, pressing the VinylGuard against the ferrule as it shrinks and tightly conforms to the flagstick

- Shrink your way up the shaft, rotating the flagstick while applying heat
- Apply sufficient heat to remove any wrinkles
- After shrinking, trim the excess vinyl with a sharp blade or utility knife

FS-5000 for ½" Regulation Flagsticks

FS-7550 for ¾" Tapered Tournament Flagsticks

We recommend the high temperature **VT-1100** heat gun with a heavy duty air blower

WHAT'S BEING SAID...

"The product is one of the best that I have seen in years. The Pink Flagsticks will be a smash hit for our ladies. We are currently coating some old flagsticks this week and are going to order a set of white flags with Hot Pink embroidery with our club logo and Play for Pink on the flags. I really feel that all of the clubs in the Metro NY area would have great success with this product."

Brian Benedict, The Seawane Club, Hewlett Harbor, NY
